107,800 yen (98,000 yen excluding consumption tax) Beige J0K6, Black J0K7 This is a highly functional and

high-performance cooler box made from the tarpaulin material of the Land Cruiser "70" for overseas shipments. The insulation material is made of vacuum insulation panels with excellent insulation properties, which are also used for transporting vaccines, on six sides. It is lightweight and has a maximum ice retention period of 15 days*1. In addition, despite its compact size, it has an outstanding storage capacity of 41L. We also paid particular attention to the size, which allows 2L PET bottles to be placed vertically. The handles and shoulder strap are made of Think Scrap*2 seat belt scraps. It can be used in a variety of ways, such as four handles, two moldings on the front and back, and shoulder straps. It can be folded in half when not in use, making it a very convenient item. Includes the car name logo. Color: Beige, Black Material:

A special key that activates Plus Support (acceleration suppression during sudden acceleration) simply by unlocking the door. Regardless of whether there is an obstacle or not, if the system detects excessive or incorrect application of the accelerator pedal, it will suppress the vehicle's acceleration. The driver is alerted by a warning buzzer and the multi-information display. Acceleration is possible when acceleration is required, such as when turning right or left. The system may be activated if you turn right or left or change lanes without operating the turn signal lever, or if you start off without applying the brake (including when stopped with the brake hold). Even in this case, you can accelerate by releasing the accelerator pedal

once and then slowly applying it again. Color: Satin Gold Size: Approx. L74 x W43 x H18mm

Plus Support may not function in the following cases: y When a registered standard smart key is near the vehicle y When the door is not locked after use in normal mode Be sure to use the Plus Support smart key only near or inside the vehicle. If Plus Support does not function, lock the door once with the Plus Support smart key, then unlock it again with only the Plus Support smart key in hand.

Caution yThe acceleration suppression function during sudden acceleration is not a function that stops automatically. The driver must step on the brake pedal to stop the vehicle. It is not a system that controls the brakes. yThe system may be activated unintentionally when driving by stepping on the accelerator quickly and strongly. yDo not carry the Plus Support smart key and the standard smart key at the same time. Carry only one type of key that suits your purpose. If both keys are nearby, the Plus Support smart key cannot be determined and Plus Support may not be activated. Also, check that the multi-information display is showing that the system is running. yA mechanical key is not included with this product. Please use this product by replacing the mechanical key that comes with the standard smart key. yIf there is no mechanical key, the door lock will not be released when the electronic key battery runs out. You can also purchase an additional mechanical key. Please contact the dealer where you purchased the product. yIt works when the vehicle speed is approximately 30km/h or less. yIt works when moving forward and backward. yIf you are using an implantable cardiac pacemaker or other device, please do not place the implantable cardiac pacemaker or other device within approximately 22 cm of the transmitter installed in the vehicle as radio waves may affect such devices. Radio wave transmission can also be stopped, so please ask your dealer for details. *Please ask your dealer for details. [Warranty] Toyota genuine products: 3 years 60,000 km
